

Transitioning
towards net
zero for road
freight

Working through
complexity

NATROAD

NATIONAL ROAD TRANSPORT ASSOCIATION

The transition to net zero is complex.

Uncertainty
Indecision
Financial risk
Cost
Lack of investment

Climate and financial sustainability will be increasingly interdependent into the future

NatRoad framework for net zero transition

STRATEGIES

ROAD PRICING REFORM

Strengthen link between road user charges and infrastructure funding

CRITICAL INFRASTRUCTURE

Provision of roads, bridges, charging and refueling stations.

COLLABORATION AND SHARING

Industry working together and sharing information

GUIDANCE FOR BUSINESS

Providing advice on reducing emissions to be competitive

FINANCIAL VIABILITY

Government and industry co-investment for cost parity

EFFECTIVE REGULATION

Laws to help the transition and reduce barriers

ENABLERS

ALTERNATIVE FUELS AND ENERGY

Utilisation of electric, hydrogen, renewable diesel, and other innovations

ENERGY EFFICIENCY

Continuous improvement in vehicles, digitisation, and operating practices
